

When the team already has the metrics, but not the results.

Fifteen years running service operations in fintech, mobility and large-scale BPO. I work with your team, not above it: the point is that the operation keeps working after I'm gone.

Sized to your team.

2 MONTHS **Diagnosis & roadmap**

Teams up to 30 people · one contained problem: one KPI, one channel, one process

- Diagnosis using your own data, plus interviews with the team
- Process map and root cause
- Prioritized 90-day plan, with owners
- One weekly session with you

4 MONTHS **Implementation**

Teams of 30 to 150 people · one or two processes, or a new channel

- Everything in the 2-month package
- Quality framework aligned to COPC / ISO 9001
- Metrics dashboard and review routine
- Training for the team and its leaders
- Fortnightly support through execution

For large operations.

6 MONTHS Transformation

More than 150 people · multi-channel operation, or service delivered by a BPO

- Everything above
- End-to-end operating model
- QA with speech analytics and automation
- Building the manager layer
- Documented handover and close

If the system you already have has been running for more than 6 months, the engagement is not extended. If a new tool or vendor is needed, the contract can extend to 12 months to cover procurement and implementation.

Three steps.

- 1 A 30-minute call, at no cost, to understand the problem.
- 2 Proposal within 5 business days: scope, deliverables, schedule and investment.
- 3 We start with the data and the tools you already have; I don't ask for new systems.
 - If one is needed, it comes with a minimum of 3 to 6 months of implementation to align it, tune it and leave it under control, including my exit transition.

How we work.

Two-month renewable contract, with the package as the horizon and a maximum of twelve months per client.

Remote, with in-person sessions in Mexico City and the option of one week on site per month. Travel outside Mexico City at the client's request and expense.

Confidentiality in writing. Your operation's data doesn't leave and isn't used as an example without your permission. I work in Spanish and English.

If after a year the operation still needs me, I didn't do my job.
